

(a) Gaußsches Gitter ($\mathbb{Z}[i]$)

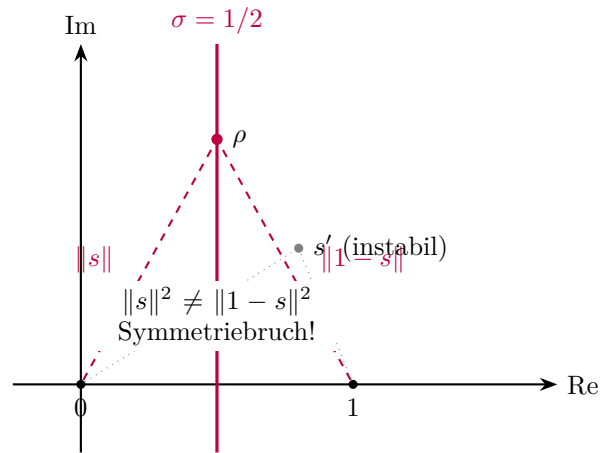

Symmetrie: D_4 (90°)
Basis für $\mathbb{H}$ -Strukturen

(b) Eisenstein-Gitter ($\mathbb{Z}[\omega]$)

Symmetrie: A_2 (60°)
Basis für $\mathbb{O}$ (E_8 -Schnitt)

(c) Hurwitz-Stabilität

Norm-Dualität $\|s\| = \|1-s\|$
erzwingt $\operatorname{Re}(s) = 1/2$
